

Delta Bar 1000 (Fixed) & 2000 (Removable) Window Bars

Product Data Sheet 14/1

Specification

The award winning Delta Bar 2000 removable window bar system features anti-cut steel bars which are securely locked into position to protect vulnerable window openings, but can be released from the inside to allow total vision or maintenance of windows.

Delta Bar 2000 offers a highly effective protection system that offers progressively enhanced levels of security.

Suitable for installation in a horizontal or vertical format, the Delta Bar 2000 is finished to a high standard and delivers security that is quick and easy to install yet highly effective.

A fixed bar system the Delta Bar 1000 is also available for locations where removal units are not a requirement or practical.

The fixed window bars can be manufactured using a flat, angle or a steel hollow section at the top and bottom of the reveal.

The bottom retainer is secured to the window cill, the 20mm diameter bars inserted into the retaining holes and or welded to the flat or angle then secured at the top by the upper retainer.

All parts are polyester powder coated to a high quality giving an excellent aesthetic appearance.

As with the removable system the Delta Bar 1000 can be mounted horizontally as well as the standard vertical method.

We reserve the right to change the specification without prior notification or alteration of the product data sheet.
