

**Delta Grille 2000 Steel Security Gates**

**Product Data Sheet**  
**13 / 2**

**Specification**

The Delta Grille 2000 is an insurance approved retractable security system offering a mix of security with elegance and is ideal for home or workplace. The high security 2000 model has added structural strength from a specially designed lattice assembly using high patented grade steel inter-screws.

The system can be fitted to the face or reveal of a window or door aperture and can be specified in a single or double sash configuration. Where a clear safe walk through is required the bottom track can, as an optional extra, be made to fold up.

When protection is needed, Delta Grille 2000 acts as a visible deterrent to would be intruders who, should they persist, will meet an effective barrier to entry. When not in use Delta Grille 2000 is unobtrusive and compact. The sashes fold neatly to the side, out of sight behind curtains or vertical blinds.

**For Residential Properties - Matching Strength with Style**

In high risk areas or simply for added peace of mind, the Delta Grille 2000 is an excellent choice for home protection. With added structural strength combined with many of the features of the Delta Grille 1000, the model 2000 offers style, unobtrusive security alongside potential insurance benefits.

**For Retail Premises – Visible Deterrent, Visible Stock**

The added security and strength of the insurance approved Delta Grille 2000 offers effective protection of high value stock in window and store displays. Combining many of the features of the Delta Grille 1000 with increased structural strength and in most cases, 4 point locking, the Delta Grille 2000 has optional folding bottom track to allow unrestricted access through doorways when the gates are open and compact sashes which fold neatly to the side giving unobscured visibility of window displays.

**For Commercial Premises – Secure Yet Unobtrusive**

Businesses in vulnerable locations or premises containing valuable equipment are often targeted by criminals. Either on an insurance companies recommendation or to pre-empt future attacks, the insurance approved Delta Grille 2000 is the perfect choice. Offering enhanced strength and security with minimal obstruction to visibility and natural daylight even when the gates are in the closed position, premises and staff are protected with no deduction to the appearance of the office environment.

**Benefits**

- **Strong** – Made from galvanised steel with a patented fixing system.
- **Versatile** – Custom built for almost any opening, grilles fit internally in either the window reveal or around the opening in either single or double sash configurations.
- **Ease of use** – Smooth top running operation with an option of a folding bottom track to leave doorways unobstructed.
- **Secure** – Multi-point locking (4 in most cases, with three on smaller grilles) operating from a single key which is out of view of potential attackers whilst remaining easy to operate from either side.
- **Construction** - High grade steel construction in the traditional 'X' cross lattice as standard and 'S' lattice as a softer appearing option.
- **High Quality Maintenance Free** – Supplied in high quality white powder coated finish as standard. Other colours are available on request from stock.
